SHARE. DISCOVER. PROGRESS.

Applied Ecology Resources is a globally accessible open platform to share and discover information on the management of biodiversity and the environment.

## APPLIED ECOLOGY RESOURCES

Discover an ever-growing collection of information sources such as case studies, policy documents, reports and original research that can help progress our understanding and management of the natural world.

Browse and filter results on our searchable platform to find the information you need. Stay up to date with new content in your areas of interest through topic alerts.

## Ecological Solutions and Evidence

At the centre of AER is a new peer-reviewed open access journal, *Ecological Solutions and Evidence*, publishing articles with direct relevance for the management of biological resources and ecological systems.

Our international editorial board has a wide range of expertise across academia, government and practice.

### READ THE JOURNAL

We welcome original Research Articles, Data Articles, Registered Reports and case studies or short summaries communicating key findings from practice.

Contact us at [editorial@ecologicalsolutionsandevidence.org](mailto:editorial@ecologicalsolutionsandevidence.org)

## ACCESS

---

Anyone can browse and read content on AER for free. Reports, case studies and other information can be uploaded and shared through organisation-level membership.

## BECOME A MEMBER

---

### AER Membership:

- helps raise the profile of your organisation by showcasing your work to a global community
- supports your capacity-building strategy and demonstrates the value of the information you generate
- allows you to easily share your information, helping to improve best practice

We can receive documents written in most languages and a summary in English will be generated during the archiving process.

Membership is available at a range of tiers and price-points designed to suit all types of organisations.

## KEY MEMBERSHIP BENEFITS

---

Upload reports and literature for long-term archiving and greater discoverability

Display prominent branding for your archived content

Publish for free or at a discounted price in *Ecological Solutions and Evidence*

Advertise your events to a broad international audience

Access training resources to improve the communication and publishing skills of your staff

## What our members say...

“Making our science and evidence more visible and accessible to our own staff and to a global audience will help to make evidence-based decisions that benefit the natural environment with greater ease and confidence.”

**Natural England, UK**

“We publish reviews and reports relating to our biodiversity projects on our website so that they are publicly accessible. Applied Ecology Resources enables us to do this in a much more accessible manner, by collating our documents in a single shared database for the sector.”

**Field Studies Council, UK**
